

ark Auto Lock Cylinder

High quality seven pin lock

The **ark Auto Lock Cylinder** is designed to keep your ark Auto key safes secure while being easy to use. Its high-quality seven-pin lock and unique octagon design ensure smooth turning and dependable protection every time you use your key.

Made from solid brass with a chrome finish, it won't rust and works perfectly both indoors and outdoors. The lock also has a special anti-drill centre for extra security against forced entry.

Every part is precisely made for long-lasting performance, and it's been tested to work over 5,000 times, that's more than 10 years of everyday use. Each customer has a unique differ, ensuring the possibility of another key opening your mechanism is very low.
