

ark Auto Key Safe

Increase the efficiency of your automotive business with smarter, faster vehicle key management.

The ark Auto key safe is a large yet lightweight key storage box available as; **ark Auto Over the Window** which can be easily attached to the window of any vehicle, and **ark Auto Permanent Mount** which can be installed directly onto a nearby wall or surface - storing vehicle keys at the point of need and making access quick and simple.

ark Auto

- **Large storage capacity:** Designed to fit both sets of car keys and key cards.
- **Easy to handle & transport:** Made from ultra-lightweight aluminium, making it easy to carry and install.
- **Uniquely customised:** The ark Auto key lock is completely unique to each customer, maximising security.
- **Weather resistant:** Weather proof seal protects keys from rain, dust, and harsh conditions, extending the life of the key safe.
- **Protective:** Foam door protector pad prevents vehicle windows from being scratched.
- **Long-term reliability:** Designed in the UK and built from durable materials to ensure lasting performance. The locking mechanism has been cyclically tested for over 5k cycles without issue, equivalent to 10-year life, based on 7 uses per week.
- **Quick and secure closure:** Made with a push-shut locking mechanism, allowing it to be locked quickly and easily without needing to use the key.
- **Versatile design:** Easy to mount and simple to replace lock cylinders.
- **Triangular bracket construction:** Designed to optimise strength and prevent bending or warping from accidental damage.

Built to last

Built to last, the **ark Auto Over the Window** and **Permanent Mount** key safes are constructed from a special aluminium alloy, making them lightweight and durable.

The secure locking mechanism is unique to each customer and cannot be duplicated, and ark Auto can be provided with as many keys as needed, allowing members of your team to move vehicles quickly, without having to switch between keys.

There is a protective cover over the lock to keep dirt and moisture away from the key, and has been tested for durability to ensure longevity and reliability.

A push-shut locking feature means the key safe can be locked without having to use the key, boosting efficiency when a large number of boxes have to be checked.

Warranty: 2 year warranty for mechanism only-excludes accidental damage

How it works

ark Auto Over the Window can be installed in seconds. The stainless-steel hanger easily drops over the window, a padded foam back prevents any damage to the car. Once the window and door are closed the key safe is held firmly in place – simple installation, no tools required.

For those applications where window access is impractical, ark Auto Permanent Mount version is available, which comes with the required fixings you need to install it on a wall or surface.

For all automotive needs
